3 STEPS to GREAT Wi-Fi EVERY DAY
STEP 1

A Great Network Starts with a Great Design

INPUT
Get your requirements in order

- Concrete & Steel Exterior
- Glass Conference Rooms
- Streaming 4K Video
- Email
- 4,000 Employees
- Real-time Voice
- 95% Primary Coverage

97.5%
Success Rate

40 APs
# of Access Points

OUTPUT
Wi-Fi perfectly designed to your business needs

The *RIGHT* number of APs
Get awesome Wi-Fi performance and reliability without overspending on unnecessary infrastructure.

In the *RIGHT* locations
Using thousands of iterations, Ekahau's AI Pro software helps you identify the exact right locations to mount your wireless access points.

With the *RIGHT* configurations
Skip the guesswork with automatic channel plans and AP settings perfectly tuned to your requirements and layout.

STEP 2

Validate Your Design with Super Accurate Sidekick 2 Measurements

ACCURACY MATTERS
Your design relies on the accuracy of your floor plan, your inputs and your measurements to perform like you intended.

Dongle Warning! USB Wi-Fi dongles and internal adapters have huge measurement variances and are not purpose-built for site surveys. Don't put your Wi-Fi network at risk!

THE SIDEKICK 2 IS ACCURACY DEFINED
Fastest, most accurate, all-in-one Wi-Fi diagnostic and measurement device.

- Validates if your design will work in the real world
- Identifies invisible interferers you might not know about
- Saves you money by getting it right the first time, before you run cables or commit to a costly deployment

ekahau

STEP 3

Maintain Great Wi-Fi with Regular Health Checks

Your wireless network needs monthly or quarterly health checks to account for changes over time:

- Troubleshoot proactively and spot interference issues before they become major outages
- Identify and address network-impacting changes, like adding new bandwidth-hungry employees, devices, or applications, or making any changes to the physical environment
- Ekahau tools are so powerful and sophisticated that anyone can use them to collect data

Don't let a good network go bad. Visualize changes with Ekahau Connect and make an optimization plan.

EKAHAU CONNECT

Ekahau Sidekick 2®
The fastest, most precise Wi-Fi testing and measurement device now supercharged and tuned for 6 GHz (Wi-Fi 6E), 5 GHz and 2.4 GHz.
Ekahau AI Pro™
Powerful Wi-Fi planning and AI design software for the most reliable, best performing wireless networks – including 6 GHz.

Ekahau Survey™
Professional Wi-Fi site survey app for Android and iOS optimized for use with Ekahau Sidekick 2.

Ekahau Analyzer™
Powerful Wi-Fi health validation and troubleshooting app for Android and iOS, optimized for use with Sidekick 2.

Ekahau Capture™
Easy-to-use packet capture tool for advanced troubleshooting and in-depth analysis.

Ekahau Cloud™
Collaborate across teams and work on the same project to leverage onsite staff and remote Wi-Fi experts.

Ekahau Insights™
Wi-Fi performance analytics with automatic issue identification to improve network quality and minimize downtime.
