HiveRadar WSSK v3

The all new HiveRadar WSSK v3 is the best wireless site survey kit on the market. We have improved an already great product and made it even better all within the same form-factor. HiveRadar WSSK v3 supports virtually any vendors wireless access points.

Ultimate Portability & Airline Friendly

HiveRadar WSSK v3 meets the carry on dimensions specified by virtually all major airlines. It is extremely portable and using the integrated retractable handle allows you to effortlessly wheel and maneuver the kit.

Water - resistant

The HiveRadar WSSK v3 retains the rugged impact protection to keep your survey gear safe. It is not waterproof for use in inclement weather. It is water resistant with all outlets capped. It can be secured with optional TSA friendly locks or latches.

Big Things In A Small Package

Despite its compact size the new HiveRadar WSSK v3 has bigger surprises in store

Height & Stability

The fully extended height has gone up from 9ft to over 12ft. Increased height also requires a stable base. You no longer need to purchase a tethering kit. Included in the kit is a heavy duty non-skid, articulating stabilizer feet for tool free installation. All components neatly tuck away in the case.

Universal AP Mounting System

The new universal AP mounting bracket is sturdier with a crisp clean finish. 90deg swivel allows positioning for ceiling or wall mount deployments & stiffer rigidity for heavier AP's.

Quick locks ensure the mounting bracket is aligned correctly to the front of the kit.

Also new to the bracket is a mini ball-head for mounting a Go-pro or a 360cam. Take a birds eye-view time-lapse of your wifi survey engagement and showcase your work.

Custom Cables

Fabric wrapped or in thermal sleeves for durability and safety while also maintaining the overall aesthetics of the kit. Velcro cable ties strategically placed for a tangle free attachment to the pole.

Laser Etched RJ45 connection indicators make it simple.

AccelTex Accelerator V2 Battery Slots

The HiveRadar AccelTex Edition features a specially designed battery holder, tailored to support two AccelTex The Accelerator V2 batteries.

This custom holder ensures a secure fit and convenient setup for your equipment. To enhance usability, the cables are pre-routed and clearly labeled, simplifying the connection process and reducing setup time. This thoughtful design allows for easy maintenance and quick battery replacements for external charging.

Customizable Foam

Majority of our customers prefer to incorporate their own essential tools and require flexibility. We are now including "pluck-foam" that makes it easy to customize your kit with your own tools you deem essential.

***The Accelerator V2 Battery not included with the kit. To be purchased separately.**

PROJECT PLANNER

The HiveRadar Project planner is companion web application to manage and log wifi site survey projects; from scheduling project meetings, uploading your floorplan, taking site notes, photographs, voice memos, logging your project expenses, revenues to monitoring the progress of your projects to it's completion.

EKAHAU AI PRO

You are free to use your own favorite site survey software or bundle the kit with Ekahau AI PRO software, which offers powerful Wi-Fi planning and AI design for the most reliable, best performing 2.4/5/6 GHz wireless networks. Design, analyze, optimize, and troubleshoot enterprise Wi-Fi networks. Pair it with Sidekick 2, the fastest and most precise Wi-Fi testing and measurement device, supercharged and tuned for 2.4/5/6 GHz.
